

## **Download and Install Guide for the CipherLab® 8000 Physical Inventory Scanner (PDT)**

**Operating Systems: Microsoft® Windows® 2000/XP/Vista**

**QuickBooks Point of Sale Versions 4.0/5.0/6.0/7.0**

**NOTE:** Please make sure you have the latest updates for Point of Sale. (If needed select **Update QBPOS** from the **File** menu.)

### **Windows 2000**

#### ***To download and install the drivers:***

1. Download the file **CipherLab 8000** to your desktop.
2. Once downloaded, double-click the file on your desktop. The driver files will be automatically extracted to the following location: **C:\Drivers\CipherLab Physical Inventory Scanner**. Click **Unzip** to create the directory.
3. Click **OK** on the WinZip® Self-Extractor message.
4. Connect the scanner's cradle to an available USB port on your computer.
5. The Window's **Found New Hardware Wizard** will open.
  - a. Select **Search for a suitable driver for my device (recommended)** and click **Next**.
  - b. Select **Specify a location** and click **Next**.
  - c. The next window will ask you to select a folder. Select **C:\Drivers\CipherLab Physical Inventory Scanner** and click **OK**.
  - d. Click **Next** to install the driver.
  - e. If you receive a hardware installation warning, click **Continue Anyway**.
  - f. When the software installation completes, click **Finish**.

### **Windows XP**

#### ***To download and install the drivers:***

1. Download the file **CipherLab 8000** to your desktop.
2. Once downloaded, double-click the file on your desktop. The driver files will be automatically extracted to the following location: **C:\Drivers\CipherLab Physical Inventory Scanner**. Click **Unzip** to create the directory.
3. Click **OK** on the WinZip® Self-Extractor message.
4. Connect the scanner's cradle to an available USB port on your computer.

5. The Window's **Found New Hardware Wizard** will open.
  - a. You may be prompted to connect to Windows Update. Select **No, not at this time** and then click **Next**.
  - b. Select **Install from a list or specific location (advanced)** and click **Next**.
  - c. Select **Search for the best drivers in these locations**, and select **Include this location in the search**. Click **Browse**.
  - d. In the resulting window, select **C:\Drivers\CipherLab Physical Inventory Scanner** and then click **OK**.
  - e. Click **Next**.
  - f. If you receive a hardware installation warning, click **Continue Anyway**.
  - g. When the software installation completes, click **Finish**.

### **Windows Vista**

#### ***To download and install drivers:***

1. Download the file **CipherLab 8000** to your desktop.
2. Once downloaded, double-click the file on your desktop. The driver files will be automatically extracted to the following location: **C:\Drivers\CipherLab Physical Inventory Scanner**. Click **Unzip** to create the directory.
3. Click **OK** on the WinZip® Self-Extractor message.
4. Connect the scanner's cradle to an available USB port on your computer.
5. The Window's **Found New Hardware Wizard** will open.
  - a. Select **Locate and install driver software (recommended)**.
  - b. If you see a User Account Control Message, click **Continue**.
  - c. You will see a screen that says to insert the CD that came with your device. Select **I don't have the disc. Show me other options**.
  - d. Select **Browse my computer for driver software (advanced)**.
  - e. The next window will ask you to select a folder that contains the drivers. Browse to and select **C:\Drivers\CipherLab Physical Inventory Scanner** and click **OK**.
  - f. Click **Next** to install the software.
  - g. If you see a Windows Security warning message, select **Install this driver software anyway**.
  - h. When Windows has finished installing the driver software, click **Close**.

### **Configure Windows COM Port Settings:**

Both Point of Sale and your Windows operating system must be configured so that they will reflect the same COM port (communications port) setting for the Physical Inventory Scanner (PDT). By default, Point of Sale will assign COM port 6 to your PDT. However, Windows will not necessarily make this same assignment.

1. Access the **Windows Device Manager**.
  - a. On the Windows desktop, right-click on **My Computer** and select **Properties**.
  - b. Choose the **Hardware** tab and then click **Device Manager**.
2. Double-click **Ports (COM & LPT)**.
3. Double-click the entry for your PDT.
4. Click the **Port Settings** tab.
5. Click **Advanced**.
6. Select **COM6** in the **COM Port Number** field. (If this port is not available, see the following note.)
7. Click **OK**.

**Note:** If COM Port 6 is in use by another device, an unused COM Port should be selected. In such cases, you will need to change the port setting in Point of Sale to match, as described below.

**Configure Point of Sale for your PDT unit:**

1. Start Point of Sale.
2. From the **Edit** menu, choose **Preferences** and then select **Workstation**.
3. Click **Portable Data Terminal (Physical Inventory Scanner** in Versions 6.0 and 7.0) in the preferences list.
4. Select **CIPHERLAB 8000 (USB)** in the **Portable Data Terminal** or **Physical Inventory Scanner** field.
5. Select the COM Port number that matches the COM Port you assigned to the PDT in Windows.
6. Click **Save**.

***Your PDT is ready to use with Point of Sale!***
